

This light-weight
packs a heavy-weight
punch

Smi-Carr, Inc.
STAKE|ALL™

Smi-Carr, Inc.
2573 Pine St.
Abilene, TX 79601

In 1965, **Smi-Carr, Inc.** brought you the original Stake Chaser® marking whisker, a revolutionary marking product that could be attached to a wooden stake or 60-D nail. Over the years, the Stake Chaser® has set the bar for grade-staking, surveying, and a variety of other marking applications.

This year, we're proud to introduce our best marking product yet. The Stake All™ system features a patented hollow stake design that makes this product surprisingly light-weight and unbelievably strong. The pre-attached marking whiskers are as visible and resilient as ever. And our unique slide driver makes it easy to install Stake All™ anywhere a wooden stake can be driven (and more) without having to bend, kneel, or squat.

Don't believe it? See it for yourself:

www.smicarr.com/stakeall

▲ To install, insert the tip of the slide-driver (sold separately) into the cavity of the Stake All™.

The Stake All™ locks into place and won't accidentally slip off. ▲

▼ Drive Stake All™ into the ground while standing with our easy-to-use slide driver.

- Use wherever wood stakes are used
- Incredibly strong (tougher than oak!)
- Light weight
- Easy to install
- Time-saving
- Cost-efficient
